The NASA STI Program Office ... in Profile

Since its founding, NASA has been dedicated to the advancement of aeronautics and space science. The NASA Scientific and Technical Information (STI) Program Office plays a key part in helping NASA maintain this important role.

The NASA STI Program Office is operated by Langley Research Center, the lead center for NASA's scientific and technical information. The NASA STI Program Office provides access to the NASA STI Database, the largest collection of aeronautical and space science STI in the world. The Program Office is also NASA's institutional mechanism for disseminating the results of its research and development activities. These results are published by NASA in the NASA STI Report Series, which includes the following report types:

- **TECHNICAL PUBLICATION.** Reports of completed research or a major significant phase of research that present the results of NASA programs and include extensive data or theoretical analysis. Includes compilations of significant scientific and technical data and information deemed to be of continuing reference value. NASA's counterpart of peer-reviewed formal professional papers but has less stringent limitations on manuscript length and extent of graphic presentations.
- **TECHNICAL MEMORANDUM.** Scientific and technical findings that are preliminary or of specialized interest, e.g., quick release reports, working papers, and bibliographies that contain minimal annotation. Does not contain extensive analysis.
- **CONTRACTOR REPORT.** Scientific and technical findings by NASA-sponsored contractors and grantees.
- **CONFERENCE PUBLICATION.** Collected papers from scientific and technical conferences, symposia, seminars, or other meetings sponsored or cosponsored by NASA.
- **SPECIAL PUBLICATION.** Scientific, technical, or historical information from NASA programs, projects, and mission, often concerned with subjects having substantial public interest.
- **TECHNICAL TRANSLATION.** English-language translations of foreign scientific and technical material pertinent to NASA's mission.

Specialized services that complement the STI Program Office's diverse offerings include creating custom thesauri, building customized databases, organizing and publishing research results . . . even providing videos.

For more information about the NASA STI Program Office, see the following:

- Access the NASA STI Program Home Page at <http://www.sti.nasa.gov/STI-homepage.html>

BOREAS TE-1 SSA-Fen Soil Profile Nutrient Data

Darwin Anderson, Andrea Papagno

Summary

The BOREAS TE-1 team collected various data to characterize the soil-plant systems in the BOREAS SSA. Particular emphasis was placed on nutrient biochemistry, the stores and transfers of organic carbon, and how the characteristics were related to measured methane fluxes. The overall transect in the Prince Albert National Park (Saskatchewan, Canada) included the major plant communities and related soils that occurred in that section of the boreal forest. Soil physical, chemical, and biological measurements along the transect were used to characterize the static environment, which allowed them to be related to methane fluxes. Chamber techniques were used to provide a measure of methane production/uptake. Chamber measurements coupled with flask sampling were used to determine the seasonality of methane fluxes. This particular data set contains soil profile measurements of various nutrients at the SSA-Fen site. The data were collected from 23-May to 21-Oct-1994. The data are stored in tabular ASCII files.

1. Data Set Overview

1.1 Data Set Identification

BOREAS TE-01 SSA-Fen Soil Profile Nutrient Data

1.2 Data Set Introduction

This data set contains soil profile measurements of various nutrients taken at the BOREal Ecosystem-Atmosphere Study (BOREAS) Southern Study Area (SSA)-Fen flux tower site.

1.3 Objective/Purpose

The objective of the research was to characterize the nutrients in soil profiles at the SSA-Fen site.

1.4 Summary of Parameters

The main parameters are soil profile nutrient concentrations.

1.5 Discussion

None given.

1.6 Related Data Sets

BOREAS TF-11 SSA-Fen Flux and Meteorological Data

BOREAS TF-11 Biomass Data over the SSA-Fen

BOREAS TF-11 CO₂ and CH₄ Concentration data from the SSA-Fen

BOREAS TF-11 CO₂ and CH₄ Flux data from the SSA-Fen

BOREAS TF-11 Decomposition Data over the SSA-Fen

BOREAS TGB-01/TGB-03 NEE Data over the NSA Fen

BOREAS TGB-05 Dissolved Organic Carbon Data from NSA Beaver Ponds

2. Investigator(s)

2.1 Investigator(s) Name and Title

Dr. Darwin Anderson

Research Professor

University of Saskatchewan

2.2 Title of Investigation

Stores and Dynamics of Organic Matter in Boreal Ecosystems

2.3 Contact Information

Contact 1:

3. Theory of Measurements

None given.

4. Equipment

4.1 Sensor/Instrument Description

None given.

4.1.1 Collection Environment

Nutrient concentrations were determined under all ambient environmental conditions.

4.1.2 Source/Platform

Ground.

4.1.3 Source/Platform Mission Objectives

The mission objective was to determine the nutrients concentrations over at the SSA-Fen.

4.1.4 Key Variables

The key variables measured were the nutrient concentrations.

4.1.5 Principles of Operation

None given.

4.1.6 Sensor/Instrument Measurement Geometry

Not applicable.

4.1.7 Manufacturer of Sensor/Instrument

None given.

4.2 Calibration

4.2.1 Specifications

None given.

4.2.1.1 Tolerance

None given.

4.2.2 Frequency of Calibration

None given.

4.2.3 Other Calibration Information

None given.

5. Data Acquisition Methods

None given.

6. Observations

6.1 Data Notes

None given.

6.2 Field Notes

None given.

7. Data Description

7.1 Spatial Characteristics

7.1.1 Spatial Coverage

The North American Datum of 1983 (NAD83) coordinates of the SSA-Fen flux tower (site id F0L9T), close to where the measurements were taken, are 53.80206° N Lat, 104.61798° W Long, Universal Transverse Mercator (UTM) Zone 13, N: 5,961,566.6, E: 525,159.8.

7.1.2 Spatial Coverage Map

Not available.

7.1.3 Spatial Resolution

These are point source measurements along a transect near the given location.

7.1.4 Projection

Not applicable.

7.1.5 Grid Description

Not applicable.

7.2 Temporal Characteristics

7.2.1 Temporal Coverage

The data were collected from 23-May to 21-Oct-1994.

7.2.2 Temporal Coverage Map

Not available.

7.2.3 Temporal Resolution

Measurements were taken on a daily basis. Three methane flux measurements, one obtained from each of the closed chambers, were averaged every two to four days from 23-May to 21-Oct-1994.

7.3 Data Characteristics

7.3.1 Parameter/Variable

The parameters contained in the data files on the CD-ROM are:

7.3.2 Variable Description/Definition

The descriptions of the parameters contained in the data files on the CD-ROM are:

Column Name	Description
SITE_NAME	The identifier assigned to the site by BOREAS, in the format SSS-TTT-CCCC, where SSS identifies the portion of the study area: NSA, SSA, REG, TRN, and TTT identifies the cover type for the site, 999 if unknown, and CCCC is the identifier for site, exactly what it means will vary with site type.
SUB_SITE	The identifier assigned to the sub-site by BOREAS, in the format GGGGG-IIIII, where GGGGG is the group associated with the sub-site instrument, e.g. HYD06 or STAFF, and IIIII is the identifier for sub-site, often this will refer to an instrument.
DATE_OBS	The date on which the data were collected.
SITE_COMMENTS	Descriptive information to clarify or enhance the site information.
MEAN_CH4_FLUX	Mean of all daily methane flux measurements.
SDEV_CH4_FLUX	The standard deviation of all daily methane flux measurements.
MEDIAN_CH4_FLUX	Median of all daily methane flux measurements.
FIRST_QUARTILE	1ST quartile of all daily methane flux measurements.
FOURTH_QUARTILE	4TH quartile of all daily methane flux measurements.
WATER_LVL	The water level from peat surface.
PEAT_TEMP_10CM	Peat temperature at 10 cm depth.
PEAT_TEMP_50CM	Peat temperature at 50 cm depth.
PEAT_TEMP_100CM	Peat temperature at 100 cm depth.
PEAT_TEMP_150CM	Peat temperature at 150 cm depth.
PEAT_TEMP_200CM	Peat temperature at 200 cm depth.
PEAT_TEMP_250CM	Peat temperature at 250 cm depth.
TOT_C_CONC_SURF	Total carbon concentration in the peat surface.

TOT_C_CONC_50CM	Total carbon concentration in the peat at 50 cm depth.
TOT_C_CONC_100CM	Total carbon concentration in the peat at 100 cm depth.
TOT_C_CONC_150CM	Total carbon concentration in the peat at 150 cm depth.
TOT_C_CONC_200CM	Total carbon concentration in the peat at 200 cm depth.
TOT_C_CONC_250CM	Total carbon concentration in the peat at 250 cm depth.
DIC_CONC_SURF	Dissolved inorganic carbon concentration in the surface of the peat.
DIC_CONC_50CM	Dissolved inorganic carbon concentration in the peat at 50 cm depth.
DIC_CONC_100CM	Dissolved inorganic carbon concentration in the peat at 100 cm depth.
DIC_CONC_150CM	Dissolved inorganic carbon concentration in the peat at 150 cm depth.
DIC_CONC_200CM	Dissolved inorganic carbon concentration in the peat 200 cm depth.
DIC_CONC_250CM	Dissolved inorganic carbon concentration in the peat at 250 cm depth.
DOC_CONC_SURF	Dissolved organic carbon concentration in the surface of the peat.
DOC_CONC_50CM	Dissolved organic carbon concentration in the peat 50 cm depth.
DOC_CONC_100CM	Dissolved organic carbon concentration in the peat at 100 cm depth.
DOC_CONC_150CM	Dissolved organic carbon concentration in the peat at 150 cm depth.
DOC_CONC_200CM	Dissolved organic carbon concentration in the peat at 200 cm depth.
DOC_CONC_250CM	Dissolved organic carbon concentration in the peat at 250 cm depth.
TOT_N_CONC_SURF	Total nitrogen concentration in the surface of the peat.
TOT_N_50CM	Total nitrogen concentration in the peat at 50 cm depth.
TOT_N_100CM	Total nitrogen concentration in the peat at 100 cm depth.
TOT_N_CONC_150CM	Total nitrogen concentration in the peat at 150 cm depth.
TOT_N_CONC_200CM	Total nitrogen concentration in the peat at 200 cm depth.
TOT_N_CONC_250CM	Total nitrogen concentration in the peat at 250 cm depth.
NO3_CONC_SURF	Nitrate concentration at the peat surface.
NO3_CONC_50CM	Nitrate concentration in the peat at 50 cm depth.
NO3_CONC_100CM	Nitrate concentration in the peat at 100 cm depth.
NO3_CONC_150CM	Nitrate concentration in the peat at 150 cm depth.
NO3_CONC_200CM	Nitrate concentration in the peat at 200 cm depth.

NO3_CONC_250CM	Nitrate concentration in the peat at 250 cm depth.
NH4_CONC_SURF	Ammonia concentration at the peat surface.
NH4_CONC_50CM	Ammonia concentration in the peat at 50 cm depth.
NH4_CONC_100CM	Ammonia concentration in the peat at 100 cm depth.
NH4_CONC_150CM	Ammonia concentration in the peat at 150 cm depth.
NH4_CONC_200CM	Ammonia concentration in the peat at 200 cm depth.
NH4_CONC_250CM	Ammonia concentration in the peat at 250 cm depth.
ORGANIC_N_CONC_SURF	Organic nitrogen concentration at the peat surface.
ORGANIC_N_CONC_50CM	Organic nitrogen concentration in the peat at 50 cm depth.
ORGANIC_N_CONC_100CM	Organic nitrogen concentration in the peat at 100 cm depth.
ORGANIC_N_CONC_150CM	Organic nitrogen concentration in the peat at 150 cm depth.
ORGANIC_N_CONC_200CM	Organic nitrogen concentration in the peat at 200 cm depth.
ORGANIC_N_CONC_250CM	Organic nitrogen concentration in the peat at 250 cm depth.
TOT_S_SURF	Total sulfur concentration at the peat surface.
TOT_S_CONC_50CM	Total sulfur concentration in the peat at 50 cm depth.
TOT_S_CONC_100CM	Total sulfur concentration in the peat at 100 cm depth.
TOT_S_CONC_150CM	Total sulfur concentration in the peat at 150 cm depth.
TOT_S_CONC_200CM	Total sulfur concentration in the peat at 200 cm depth.
TOT_S_CONC_250CM	Total sulfur concentration in the peat at 250 cm depth.
SO4_CONC_SURF	SO4 concentration at the peat surface.
SO4_CONC_50CM	SO4 concentration in the peat at 50 cm depth.
SO4_CONC_100CM	SO4 concentration in the peat at 100 cm depth.
SO4_CONC_150CM	SO4 concentration in the peat at 150 cm depth.
SO4_CONC_200CM	SO4 concentration in the peat at 200 cm depth.
SO4_CONC_250CM	SO4 concentration in the peat at 250 cm depth.
INORGANIC_P_CONC_SURF	Inorganic phosphorous concentration at the peat surface.
INORGANIC_P_CONC_50CM	Inorganic phosphorous concentration in the peat at 50 cm depth.
INORGANIC_P_CONC_100CM	Inorganic phosphorous concentration in the peat at 100 cm depth.
INORGANIC_P_CONC_150CM	Inorganic phosphorous concentration in the peat at 150 cm depth.
INORGANIC_P_CONC_200CM	Inorganic phosphorous concentration in the peat at 200 cm depth.
INORGANIC_P_CONC_250CM	Inorganic phosphorous concentration in the peat at 250 cm depth.
PH_SURF	The pH of the peat at the surface.

PH_50CM	The pH of the peat at 50 cm depth.
PH_100CM	The pH of the peat at 100 cm depth.
PH_150CM	The pH of the peat at 150 cm depth.
PH_200CM	The pH of the peat at 200 cm depth.
PH_250CM	The pH of the peat at 250 cm depth.
CRTFCN_CODE	The BOREAS certification level of the data. Examples are CPI (Checked by PI), CGR (Certified by Group), PRE (Preliminary), and CPI-??? (CPI but questionable).
REVISION_DATE	The most recent date when the information in the referenced data base table record was revised.

7.3.3 Unit of Measurement

Minimum Data Value -- The minimum value found in the column.

Maximum Data Value -- The maximum value found in the column.

Missng Data Value -- The value that indicates missing data. This is used to indicate that an attempt was made to determine the parameter value, but the attempt was unsuccessful.

Unrel Data Value -- The value that indicates unreliable data. This is used to indicate an attempt was made to determine the parameter value, but the value was deemed to be unreliable by the analysis personnel.

Below Detect Limit -- The value that indicates parameter values below the instruments detection limits. This is used to indicate that an attempt was made to determine the parameter value, but the analysis personnel determined that the parameter value was below the detection limit of the instrumentation.

Data Not Cllctd -- This value indicates that no attempt was made to determine the parameter value. This usually indicates that BORIS combined several similar but not identical data sets into the same data base table but this particular science team did not measure that parameter.

Blank -- Indicates that blank spaces are used to denote that type of value.

N/A -- Indicates that the value is not applicable to the respective column.

None -- Indicates that no values of that sort were found in the column.

13. Future Modifications and Plans

This data set is in its final format.

14. Software

14.1 Software Description

None given.

14.2 Software Access

None given.

15. Data Access

The SSA-Fen soil profile nutrient data are available from the Earth Observing System Data and Information System (EOSDIS) Oak Ridge National Laboratory (ORNL) Distributed Active Archive Center (DAAC).

15.1 Contact Information

For BOREAS data and documentation please contact:

ORNL DAAC User Services
Oak Ridge National Laboratory
P.O. Box 2008 MS-6407
Oak Ridge, TN 37831-6407
Phone: (423) 241-3952
Fax: (423) 574-4665
E-mail: ornldaac@ornl.gov or ornl@eos.nasa.gov

15.2 Data Center Identification

Earth Observing System Data and Information System (EOSDIS) Oak Ridge National Laboratory (ORNL) Distributed Active Archive Center (DAAC) for Biogeochemical Dynamics
<http://www-eosdis.ornl.gov/>.

15.3 Procedures for Obtaining Data

Users may obtain data directly through the ORNL DAAC online search and order system [<http://www-eosdis.ornl.gov/>] and the anonymous FTP site [<ftp://www-eosdis.ornl.gov/data/>] or by contacting User Services by electronic mail, telephone, fax, letter, or personal visit using the contact information in Section 15.1.

15.4 Data Center Status/Plans

The ORNL DAAC is the primary source for BOREAS field measurement, image, GIS, and hardcopy data products. The BOREAS CD-ROM and data referenced or listed in inventories on the CD-ROM are available from the ORNL DAAC.

16. Output Products and Availability

16.1 Tape Products

None.

16.2 Film Products

None.

16.3 Other Products

These data are available on the BOREAS CD-ROM series.

13. ABSTRACT (Maximum 200 words) The BOREAS TE-1 team collected various data to characterize the soil-plant systems in the BOREAS SSA. Particular emphasis was placed on nutrient biochemistry, the stores and transfers of organic carbon, and how the characteristics were related to measured methane fluxes. The overall transect in the Prince Albert National Park (Saskatchewan, Canada) included the major plant communities and related soils that occurred in that section of the boreal forest. Soil physical, chemical, and biological measurements along the transect were used to characterize the static environment, which allowed them to be related to methane fluxes. Chamber techniques were used to provide a measure of methane production/uptake. Chamber measurements coupled with flask sampling were used to determine the seasonality of methane fluxes. This particular data set contains soil profile measurements of various nutrients at the SSA-Fen site. The data were collected from 23-May to 21-Oct-1994. The data are stored in tabular ASCII files.
